Erimsah Olut

BSc Computer Engineering Student · Politecnico di Torino

erimsaholut@icloud.com · linkedin.com/in/erimsaholut · github.com/Erimsaholut · erimsaholut.github.io · Torino, Italy

PROFILE

Computer Engineering student at Politecnico di Torino, focused on cloud computing and AWS. AWS Certified Cloud Practitioner (CLF-C02). Built several Flutter apps on Firebase backends that update in real time — including a multilingual vending kiosk app now running in production at Buzlime — and enjoys data analysis with Python. Aiming to grow into a solutions engineering role; looking for an internship to gain industry experience on real cloud problems.

EDUCATION

Politecnico di Torino — BSc Computer Engineering · Torino, Italy 2024 – Present

- Relevant coursework: Python, C, Complexity Analysis, Sorting Algorithms

Celal Bayar University — BSc Software Engineering · Manisa, Türkiye 2022 – 2024

- GPA 3.62
- Academic scholarship for a high departmental ranking
- Relevant coursework: Python, C, Java, Data Structures, Object Oriented Programming

CERTIFICATIONS & COURSES

AWS Certified Cloud Practitioner (CLF-C02, Amazon Web Services)

Introduction to Software Engineering (IBM, Coursera) · Introduction to Agile Development and Scrum (IBM, Coursera) · Backend Web Development Path with Beginner Java (Patika.dev) · The Complete SQL Bootcamp (Udemy) · 100 Days of Code: The Complete Python Pro Bootcamp (Udemy) · Python for Data Science, AI & Development (IBM, Coursera) · Flutter & Dart — The Complete Guide (Academind, Udemy) · Introduction to Programming with Java (BTK Akademi, 2023) · Mathematics for Machine Learning: Linear Algebra (Imperial College London, Coursera)

PROJECTS

Vending Machine Kiosk App · Freelance · Team project — Flutter · Firebase · Firestore

A multilingual beverage kiosk that customers use on their own, with a Firestore backend that updates in real time. It now runs in production at Buzlime, a cold drink vending startup. Implemented both the frontend and the backend. Multilingual UI for self service; Live stock and sales tracking; Refund and maintenance logs. buzlime.com

Real Time Chat App · Full stack project — Flutter · Firebase Auth · Firestore

A full stack messaging platform with live updates, built on Firebase Auth and Firestore. Secure authentication; User profiles; Live group chat & friend interactions.

Café Management App · Freelance project — Flutter · Local storage

A POS and analytics system for a local café that keeps its data on the device, with visual dashboards for revenue trends and product performance. Weekly, monthly & yearly sales reports; Order volume tracking; Cost–profit ratio calculation.

Data Visualization Projects · Data analysis — Python · Jupyter · Pandas · Seaborn

A series of analysis and visualization notebooks on datasets from the real world: data cleaning, correlation analysis and visualization. Turkish provincial data: IQ, education, divorce rates, election results; Student lifestyle data: study habits, GPA and stress levels. github.com/Erimsaholut/Data-Visualization-Projects

TECHNICAL SKILLS

Cloud & platforms	AWS, Firebase
AWS services	EC2, S3, IAM, Lambda — Foundational knowledge at certification level (CLF-C02)
Programming languages	Python, Java, C, Dart, SQL, MATLAB
Databases	MySQL, PostgreSQL, Firestore
Frameworks	Flutter
Practices & tools	Object Oriented Programming, Agile / Scrum, Git, GitHub
Data analysis	NumPy, Pandas, Matplotlib, Seaborn

LANGUAGES

Turkish Native · **English** Fluent – C1 · **Italian** Learning
